

- 1- Modify the **POSConnect.properties** properties file and set:

TCSPOS.encrypted.login=true

- 2- `$./PCT.encryptLogin`

Enter the database login ID to encrypt: bksadmin

*Enter the database password: ******

*Re-enter the database password: ******

*Encrypted login: **8KPb+ZAnE27FzXPSsV8QGg==***

*Encrypted password: **z8T59YUVgWDFzXPSsV8QGg==***

- 3- Modify the DB properties file with the new username/password by copying and pasting the above information into properties file:

TCSPOS.database.UserName=8KPb+ZAnE27FzXPSsV8QGg==

TCSPOS.database.Password=z8T59YUVgWDFzXPSsV8QGg==

- 4- Restart the listener.

NOTE: If TCSPOS.encrypted.login property is not set to true or not present, it'll assume the credentials are not encrypted.
