

POS Connect

Making the connections between your Bookstore and your Business Office

POSConnect is a client-ready and user configurable and installable product that provides a seamless real-time integration between any Bookstore POS and Student Information System.

POSConnect can be integrated with any Bookstore POS by posting XML documents via https protocol.

POSConnect base product can be customized to each client's specific environment by allowing the end-users to configure parameters in the system Environment files.

Options not included in the base product can be customized at client's request.

POSConnect consists of two Modules:

- 1- Listener - Java Based
- 2- Application-SIS Suite of wrapper subroutines

- Enforces Accuracy To the penny
- Fast Response Time
- Reporting Feature and Audit Trails
